PROFESSIONAL SUMMARY

Results-driven Full-Stack Web Developer with 2+ years of hands-on experience designing and developing scalable, high-performance web applications. Skilled in both front-end (React.js, Next.js, TypeScript) and back-end (ASP.NET Core, SQL Server, Azure) technologies. Experienced in cloud integration, CI/CD automation, and real-time systems using SignalR. Proven success working with international clients (Norway-based projects), collaborating across teams, and delivering clean, maintainable code that supports business goals.

TECHNICAL SKILLS

- **Front-End:** React.js, Next.js, HTML, CSS, JavaScript (ES6+), TypeScript, Tailwind CSS, Bootstrap, AntDesign, SASS/SCSS
- **Back-End:** ASP.NET Core, REST APIs, Entity Framework Core, JWT Authentication, SignalR
- **Databases:** SQL Server
- **DevOps & Cloud:** Microsoft Azure, Azure Functions, Azure Blob Storage, GitHub Actions, Docker, CI/CD Pipelines
- **Tools & Practices:** Git, Agile/Scrum, Responsive Design, Clean Architecture, Cross-functional Collaboration

EXPERIENCE

Full-Stack Developer — ItTrends | Jan 2023 – Present

- Developed modern, responsive UIs for company websites (ItTrends, Plusnor) using React.js and TypeScript, improving page load performance by 30%.
- Designed and implemented RESTful APIs in C# (.NET), optimizing data retrieval and reducing server response time by 25%.
- Implemented stored procedures and optimized database queries, reducing data-loading times by 50%
- Managed SQL Server databases, implemented stored procedures, and ensured strong data integrity across multi-tenant systems.
- Integrated Azure Blob Storage for secure document uploads and Microsoft Graph API for Outlook integration.
- Deployed CI/CD pipelines using GitHub Actions and Azure Pipelines to automate build and deployment.
- Collaborated cross-functionally with designers and stakeholders to enhance UI/UX consistency and accessibility.

Front-End Developer — OrderNation | Feb 2022 – Dec 2022

- Developed responsive and mobile-friendly front-end layouts for e-commerce and order management platforms.
- Converted UI/UX designs into clean, reusable components following best coding practices.
- Ensured cross-browser compatibility and optimized page load performance for better user experience.

PROJECTS

EquiNet (Norway-based) — Full Stack Engineer (.NET, React.js)

A web platform connecting horse trainers, riding schools, and students.

- Developed core features including lesson scheduling, user dashboards, and Stripe-based payments.
- Built robust backend APIs with ASP.NET Core and integrated secure authentication with JWT.
- Implemented features like lesson scheduling, trainer/student dashboards, course management, chat, and Stripe-based payments.
- Designed intuitive UIs and integrated secure backend services for managing users, trainers, and schools.

Tech Stack: React.js, TypeScript, ASP.NET Core, Entity Framework Core, SQL Server, Stripe API

Registo (Norway-based) — Full Stack Engineer (.NET, React.js)

Financial and task management platform for accounting firms

- Built multi-tenant architecture for client-based accounting and document workflows.
- Implemented automated task scheduling (VAT filing, payroll) and Outlook email sync via Microsoft Graph API.
- Developed live messaging features improving client-accountant communication efficiency by 40%. Tech Stack: React.js, TypeScript, ASP.NET Core, Entity Framework Core, SQL Server, SignalR, Microsoft Graph API

Talkit — *Front-End Developer (Next.js, Tailwind CSS)*

A real-time communication tool for doctors and patients

- Designed secure, responsive front-end interfaces with smooth animations and optimized performance.
- Integrated BankID login API and connected CI/CD with Azure Pipeline for automated deployment.
- Collaborated with the backend team to ensure proper API communication and error handling.

Tech Stack: Next.js, Tailwind CSS, React.js, REST APIs, Azure Pipeline

ItTrends & Plusnor — *Front-End Developer (React.js, HTML, CSS)*

Responsive websites for IT services and consulting businesses

- Developed clean, responsive layouts using HTML, CSS, and React.js, aligned with modern design and accessibility standards.
- Created structured, mobile-friendly components to ensure smooth navigation and a consistent user experience across devices.
- Collaborated with the design team to implement branding and visual identity through custom styling and layout adjustments.

Tech Stack: React.js, HTML, CSS, JavaScript

Job Portal (University Final Project) — *Full Stack Web Application*

- Built a complete job recruitment platform with two user roles — Employer and Employee.
- Employers can post jobs, and employees can apply with uploaded CVs and track their applications.
- Implemented JWT-based authentication for secure login and authorization.
- Developed REST APIs using C# (.NET)** and managed data storage with SQL Server.
- Created a responsive front-end using React.js and Tailwind CSS, offering seamless UX for both roles.

Tech Stack: React.js, ASP.NET Core, SQL Server, JWT Authentication, REST APIs, Tailwind CSS

EDUCATION

BS Computer Science

Virtual University, Pakistan

CERTIFICATIONS

- Responsive Web Design – freeCodeCamp (Mar 2022)
 - JavaScript Modern Development – Udemy (May 2022)
 - Front-End Development Libraries – freeCodeCamp (Feb 2023)
 - JavaScript Algorithms & Data Structures – freeCodeCamp (Feb 2023)
 - Introduction to Front End Development - SimpliLearn (Dec 2023)
 - Foundation C# with Microsoft - freeCodeCamp (Jan 2025)
-
